Known Security Issues PER Auskunft

ID	Title	Summary

Known Security Issues IAM System of PER Auskunft

The IAM system used in the Bug Bounty program for the product "PER Auskunft" includes specific PRE-production configurations, which may differ in some aspects from those in production. These elements are also included in the list below:

ID	Title	Summary
SEC-1610	Activated third-party IDP's	Third-party IDPs are activated on the PRE environment for test purposes only.
SEC-1490	Activated FeatureFlag AlwaysAllowedRedirectUri	The PRE environment contains a global redirect URI whitelist, which contains specific domains, independent of application-specific configurations.
SEC-1159 SEC-823	Token lifetime	A token lifetime of 24 hours is configured on the PRE environment.
SEC-919 SEC-823	RememberMe and cookie lifetime	A RememberMe and cookie lifetime of 1 week is configured on the PRE environment.
Misc.	Feature configurations	For test reasons, the following FeatureFlags are deactivated on the PRE environment: <ul style="list-style-type: none">- PreventAccountDowngrade (2FA)- SecurityNotificationsEnabled- EnableImmutableFields- EnforceAnyRoleOnAuthorization
